

Equipment at Bernie Wolfe School

- There are 3 nets available for the WCVL, all of which are hanging in the Community Storage room. You'll find them immediately to your left upon entering the gym from the parking lot doors.
- **ANTENNA/STRAPS MUST BE REMOVED FROM THE NETS.** The antennas are placed in the same room, right next to the nets.
- Additional nets, straps, and antennas are available in case any of the nets are unusable. The school has also left tape in the room for our use, just in case.

- For pole storage, **please ensure the poles are returned in reverse order**, following the diagram posted in the equipment room. The order is court 3 first (furthest from the equipment room door), then court 2, and finally court 1 (closest to the equipment room door). We understand games may not finish in this order, but we ask that teams be mindful of the remaining games and see which poles need to be put away. For example, if courts 1 and 2 finish before court 3, those teams should take down their poles and place them near the equipment room. Once court 3 finishes, the poles should be put away in the correct sequence. If you are done your game and unable to put your poles away because of a game still happening on court 2, lay them down on your court and communicate with the ref or players on court 2 that the poles are down.

IF NEEDED, THE LAST TEAM LEFT NEEDS TO MAKE SURE THIS IS DONE CORRECTLY. Even if it means correcting the poles other courts have already put in.

- Ref stands should be stored at the back of the equipment room, to the right of the short staircase, near the bins , mats, and circuit box.

Poles must be placed in holes from left to right.

The metal bar piece on the base of the pole sits on top of the pole to its left.
